Caroline is driven by her creative curiosity of her harmony in chaos. Her work is colorful, big sized and in different materials. For this project of her Bachelor, she fell in love with how light meets color they create shapes by dancing in the shadow. She started with experimenting and capturing different effects of light with different materials by photography. She made a series of 100 pictures where you here can see the selected 4. - to see all 100 visit site 1

This evolved into 3 different objects that has a play interaction with the environment by light.
